### How to cite this erratum

Eren T, Pasaoglu L (June 17, 2020) Correction: Splenomegaly in Colon Cancer During Adjuvant Oxaliplatin-based Chemotherapy. Cureus 12(6): c32. doi:10.7759/cureus.c32

## Correction Notice

A decimal point was erroneously included in the initial manuscript submission. This error was, regrettably, not caught during peer or editorial review. As a result, the decimal point has been removed from "94.4 mg/m<sup>2</sup>" as seen in the following sentence located in the results section: "The optimum cut-off value for age was 60 years, sensitivity 60% and specificity 56%; the same values for cumulative oxaliplatin dosage were, respectively, **94.4** mg/m<sup>2</sup>, 72%, and 68%."

The corrected sentence now reads: "The optimum cut-off value for age was 60 years, sensitivity 60% and specificity 56%; the same values for cumulative oxaliplatin dosage were, respectively, **944** mg/m<sup>2</sup>, 72%, and 68%."

Cureus sincerely regrets this error.
