How to cite this retraction

Mohammed A K, Monib S (April 15, 2021) Retraction: Failure of an Ancient Breast Implant Can Lead to Significant Morbidity. Cureus 13(4): r30. doi:10.7759/cureus.r30

Retraction Notice

This article has been retracted and removed due to recently discovered issues with the patient consent process. Unbeknownst to the authors at the time patient consent was granted, the patient's next of kin had power-of-attorney and therefore should have been consulted regarding patient consent. As a result, the patient consent form is not valid and the patient now wishes for the article to be removed. The authors have formally requested this retraction.
